

DEFEAT!

Fleeing the wrath of the victorious Concordat of Humanity, the remnants of the fallen United Republics of Sol must make a desperate bid for survival amongst the savage warriors of the outer rim. Always isolated from the grim struggle for survival, the tattered remnants of free humanity plunge into the perpetual brush wars and the frenzied scrabbling of the depleted rim worlds. Arrayed against them, the forces of the Concordat hunt them across the stars, determined to wipe away any memory of the Republic.

The bickering warlords and races of the far rim offer no safe harbor, distrusting of outsiders and determined to maintain their cultural identities. With no one to turn to, humanity must eke out a harsh living as mercenaries in the innumerable wars that plague the region.

But the remaining free humans soon discover something that may bring an end to the petty hatreds of their adopted home forever.

One way.

Or another.
